1 Todo

- 1. Add code and complexity
- 2. Add brief explanations

2 Contest Setup

2.1 vimrc

```
set number
                                                                     " Show line numbers
                                                                     " Enable inaction via mouse
            set mouse=a
            set showmatch
                                                                                    " Highlight matching brace
            set cursorline
                                                                                  " Show underline
                                                                                  " highlight vertical column
            set cursorcolumn
            filetype on "enable file detection syntax on "syntax highlight
                                                                                   " Auto-indent new lines
            set autoindent
                                                                                  " Number of auto-indent

contest_setup/Main.java

3 Reminder

- 1. Read the problem statements carefully. Input and output specifications are crucial!
- 2. Estimate the time complexity and memory complexity carefully.
- 3. Time penalty is 20 minutes per WA, don't rush!
- 4. Sample test cases must all be tested and passed before every submission!
- 5. Test the corner cases, such as 0, 1, -1. Test all edge cases of the input specification.

4 Useful code

- 4.1 Fast Exponentiation
- 4.2 GCD

小心負數!

- 4.3 Extended Euclidean Algorithm
- 4.4 STL quick reference
- 4.4.1 Map / Set
- 4.4.2 String
- 5 Search
- 5.1 Binary Search
- 5.1.1 Find key
- 5.1.2 Upper / lower Bound
- 5.2 折半完全列舉
- 5.3 Two-pointer 爬行法
- 6 Basic data structure
- 6.1 1D BIT
- 6.2 2D BIT
- 6.3 Union Find
- 6.4 Segment Tree

Hehe

7 Dynamic Programming

- 8 Tree
- 8.1 LCA
- 9 Graph
- 9.1 Articulation point / edge
- 9.2 BCC vertex
- 9.3 BCC edge
- 9.4 SCC
- 9.5 Shortest Path
- 9.5.1 Dijkatra
- 9.5.2 SPFA
- 9.5.3 Bellman-Ford
- 9.6 Flow
- 9.6.1 Max Flow (Dinic)
- 9.6.2 Min-Cut
- 9.6.3 Min Cost Max Flow
- 9.6.4 Maximum Bipartite Graph
- 10 String
- 10.1 KMP
- 10.2 Z Algorithm
- 10.3 Trie
- 10.4 Suffix Array
