3 Reminder

- 1. Read the problem statements carefully. Input and output specifications are crucial!
- Estimate the time complexity and memory complexity carefully.
- 3. Time penalty is 20 minutes per WA, don't rush!
- 4. Sample test cases must all be tested and passed before every submission!
- 5. Test the corner cases, such as 0, 1, -1. Test all edge cases of the input specification.

4 Useful code

4.1 Fast Exponentiation

4.2 GCD
